DIFC Courts

Cyber Resilience and Regulatory Compliance Uplift

Independent cybersecurity posture review against ISR v2 and NESAs, with a 12-month resilience programme covering governance, controls and recovery.

THE CHALLENGE

DIFC Courts required assurance over cyber posture, regulatory compliance and the ability to recover critical case-management services within agreed RTOs.

OUR APPROACH

- Gap assessment against ISR v2, NESAs and ISO 27001 control sets
- Tabletop exercises with executive and technical teams
- Re-baselined RTO/RPO for tier-1 case-management services
- Designed a 12-month remediation programme with owners

OUTCOMES

- 92% compliance achieved against ISR v2 mandatory controls
- Tier-1 RTO reduced from 24h to 4h
- Cyber governance committee operating monthly
